## FAQ

### GENERAL

#### What fish species are supported in the app?

This depends on the tool/product you're using and lake you fish. You can use our Water Clarity map, Water Inflows map, and Wind Effects map for any species. For the Best Areas map and Tournament Patterns map we currently offer the following 3:

- Largemouth Bass
- Smallmouth Bass
- Spotted Bass

To know what is available on your lake, select your lake and look at the Home tab. Tap on the button that shows the selected fish species. Within the panel that pops up you will see what species you may target for that lake.

#### Where can I change the water temperature?

When viewing our Best Areas Map or Tournament Patterns Map, it is important to have the correct season selected to view the most accurate results. This season selection has water temperature ranges as guides to help you select the fishing season. You may find this by opening the Pattern Options panel. This button is located in the top right of the map.

### LAKES

#### Do all lakes have all the same tools/products?

Deep Dive offers tools for most lakes across the United States. More popular lakes have all our tools, while others have a subset. The best way to know what is offered for a particular lake is to search for it and view its tools. What we offer can change often.

#### Do I have to pay per lake for access?

No. A Deep Dive subscription gives you access to everything we have to offer.

### WATER CLARITY

#### Where do you get the water clarity info from?

Our water clarity maps are generated by analyzing satellite imagery. Our imagery provider sends us data near daily that we then process into the blue-green-brown map that you see in the app.

### TOURNAMENT PATTERNS

#### Where do the tournament patterns come from?

Dots on the map represent real patterns collected from tournaments. The numbers show you how many patterns work best in each area.

We then filter down to the best patterns based on the current lake and weather conditions. This gives you a proven pattern that has caught bass, but only when the lake and weather conditions are right for that specific pattern.

## How do I look at future patterns?

Use the timeline control at the bottom of the screen to change the time period of the day. You may also use the arrows to change the day.

## What time of day do the timeline segments represent?

- Sunrise: First Light - 1 hour past First Light
- Morning: 1 hour past First Light - Solar Noon (when the sun is directly over you)
- Afternoon: Solar Noon - 1 hour before Last Light
- Sunset: 1 hour before Last Light - Last Light

## How do I change the weather and season?

The weather conditions are automatically fed in and update the patterns as new forecasts are available.

However, you may make changes that are critical to getting the most relevant pattern results by opening the Pattern Options panel. This button is located in the top right of the map.

## What do the effectiveness numbers mean?

Not all strategies are equal. Some are more effective than others. We make it easier for you to decide what strategy to pursue by providing these ranking numbers. The more effective strategies will always be listed first. But do keep in mind that every pattern we show is a real pattern that produced a top finish in a professional tournament.

### SUBSCRIPTIONS

## Can I have Deep Dive on my tablet as well as my phone at no extra cost?

Yes. As long as you are using the same App Store or Google Play account on both devices the subscription should be automatically shared.

### OTHER

## What features are next for Deep Dive?

Our feature idea list is long, but the rollout will be largely shaped by feedback from you. [Drop us a note](#) to let us know what's on your mind.
